

# OfferBound AI - Project Roadmap

## Vision

Build an AI platform that analyzes resumes against job descriptions, identifies skill gaps, conducts personalized AI mock interviews, and generates actionable feedback.

## Version 1 (MVP)

Phase 1: Project setup (React, Spring Boot, MySQL).

Phase 2: Authentication.

Phase 3: Resume upload.

Phase 4: Resume parsing.

Phase 5: Job description input.

Phase 6: AI resume analysis (match %, ATS, matched/missing skills, suggestions).

## Version 2

Phase 7: Learning recommendations.

Phase 8: AI mock interview.

Phase 9: Adaptive questioning.

Phase 10: AI evaluation.

Phase 11: PDF interview report.

## Version 3

Phase 12: Dashboard.

Phase 13: Interview history.

Phase 14: Voice interview, recruiter mode, analytics, deployment, testing, polish.

## Detailed Phases

1. Setup: initialize frontend/backend, DB, GitHub.
2. Auth: register/login/JWT/profile.
3. Resume Upload: upload PDF/DOCX and save.
4. Resume Parser: extract skills, education, projects, experience.
5. Job Description: input and store JD.
6. Resume Analysis: compare resume vs JD, ATS, missing skills, strengths, suggestions.
7. Learning Plan: recommend resources for missing skills.
8. Mock Interview: AI generates resume/JD-based questions.
9. Adaptive Interview: follow-up questions based on answers.
10. Evaluation: score technical, communication, confidence, problem solving.
11. Report: downloadable PDF report.
12. Dashboard: show ATS, interview score, latest reports.
13. History: previous interviews and reports.
14. Final Polish: UI, deployment, documentation, testing.

## Final Goal

User registers → uploads resume → pastes job description → receives AI analysis → improves resume → practices AI interview → receives evaluation and downloadable report → repeats until interview-ready.
