## SUMMARY

---

Artificial Intelligence undergraduate student passionate about Machine Learning, Deep Learning, Large Language Models (LLMs), and AI-powered software development. Continuously learning and exploring Java, Python, Spring Boot, MySQL, TensorFlow, and modern AI tools, with hands-on experience building AI-driven applications and full-stack projects. Eager to learn new technologies and contribute to developing scalable, real-world software solutions.

## EDUCATION

---

|                                                                                       |             |
|---------------------------------------------------------------------------------------|-------------|
| Bachelor of Technology, Artificial Intelligence, Vidya Jyothi Institute of Technology | 2023 – 2027 |
| CGPA: 8.89                                                                            |             |
| Intermediate – MPC, Sri chaitanya Jr College, Hyderabad                               | 2021 – 2023 |
| Percentage: 96.4%                                                                     |             |
| Secondary School Certificate, Daffodil’s High School, Hyderabad                       | 2020 – 2021 |
| CGPA: 10                                                                              |             |

## PROJECTS

---

### OfferBound – AI Resume Analysis & Personalized Mock Interview Platform (In Progress)

- Developing an AI-powered platform to analyze resumes against job descriptions and generate ATS-based recommendations.
- Building a Java Spring Boot backend with MySQL and integrating Python-based AI services for personalized mock interviews.

### TruthScan - AI Powered Fake Image Detection System

- Developed a full-stack web application using React.js and FastAPI to classify uploaded images as authentic or AI-generated using a TensorFlow/Keras MobileNetV2 model.
- Integrated image preprocessing with OpenCV and deployed the application on Vercel and Render, enabling real-time predictions through REST APIs with confidence scores.

### EEG-Based Emotion Detection using Quantum-Enhanced SVM

- Developed an emotion detection system using EEG brainwave signals and Quantum-Enhanced Support Vector Machine algorithms.
- Applied preprocessing and feature extraction techniques for accurate emotion classification.
- Explored the integration of quantum computing concepts with machine learning applications.

## SKILLS

---

Languages: Java, Python, SQL

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (Basics), Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Frameworks & Libraries: Spring Boot, React.js, FastAPI, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code, Google Colab, Vercel, Render

Currently Exploring: Natural Language Processing (NLP), LangChain, Retrieval-Augmented Generation (RAG), AI Agents, Streamlit
